

# HAPPY BNS + NFTember

---

Aibra King

## INTRODUCTION

Since Inception AIBRA has witnessed many milestones achieved and has promised we are gradually crossing everything that's laid down on our roadmap v1.0 and as always we believe in building and creating the best recruitment platform yet.

We wish to congratulate and thank our community members who have stuck, believed and journeyed with us this far and to welcome new members who see and share our vision.

It is the start of a new month and we wish to take this beautiful opportunity to update our respected community on our Brise Naming Service and NFT concept, utilities and use cases to our community and how far we've come. We have taken our time as we always do to provide you with the best in class.

Aibra BNS introduces naming service to the brise ecosystem, Providing Humanize Identities for the Metaverse, the BNS comes with a lot of utilities many of which will be highlighted during AMAs events

Aibra NFT presents a concept of strengths that binds AIBRA. Professionals of unique professions unified on the wall of Artificial Intelligence and Blockchain Technology carrying out the process of recruitment on a decentralized platform.

The aibra nft will represent real job roles and professions in art as this will represent you on the aibra verse. For instance if you are a software developer you will have an NFT to depict your job role and on aibra verse you don't have to start reintroducing yourself as your avatar already shows your profession.

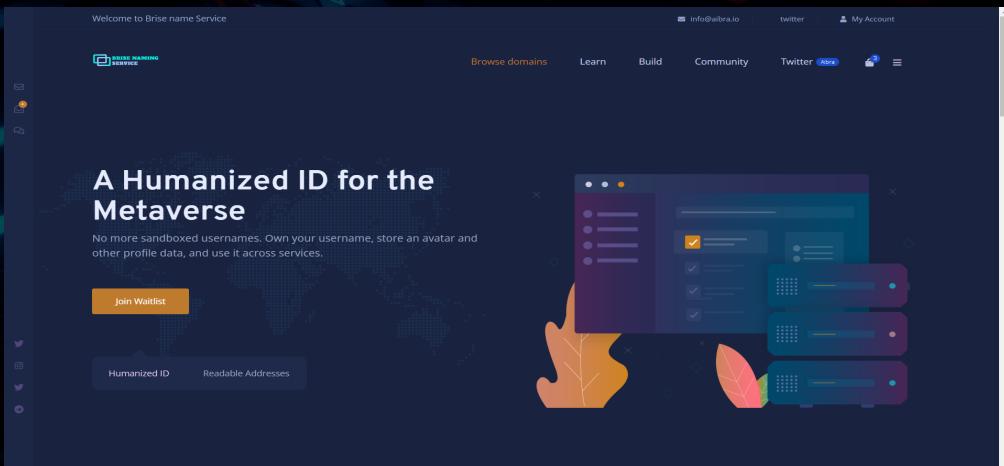

Moving forward we will organize various AMAs to further explain our NFTs to the community and we will be updating our community every step of the way.

Tune in as we long for this journey of greater accomplishment ahead.

We will now go through some of the upgrades and improvements we've so far added to the aibra app in the space of 1 month and what expect in the coming months

Currently Working On...

### 1. Brise Naming Service(BNS):

BNS introduces naming service to the brise ecosystem, Providing Humanize Identities for the Metaverse. One of the clear benefits of the name service is a human-readable name that maps to a brise address. Essentially, creating an identity for users in the metaverse enabling users to

- Quickly send & receive funds to a human readable address.
- Collect and exchange .brise names directly as nfts
- Get verified so everyone knows it's you.
- Host Projects with your unique and exotic names

## **2. Aibra NFT Concept:**

Aibra Presents its NFT Concept(black and white) with real life use and multilevel utilities on the aibra platform and beyond. Work is ongoing on the Aibra NFT collections showcasing different professions and onboarding on AIBRA platform. Expect the best nft use cases soon...

*Aibra NFT concept(Black and White) showcasing a recruiter, company and job seeker united on the table of blockchain and AI technology*

## **3. Aibra MultiLevel Staking.**

Aibra Multilevel staking is already on going as promised and is set for launch following the nft launch

## **4. Aibra Blog:**

Aibra blog is almost complete. This will create more awareness and enlighten more people on what the Aibra Verse is, what it entails, how to use the platform and our future projections..

## Still to come on AIBRA

### **1. Video Meetings and Interviews:**

In our quest to create an interactive recruitment system and one that extends beyond recruitment. Aibra will be creating a Video meet section to schedule video interviews, hold company meetings or even schedule seminars and trainings for users of the Aibra app.

### **2. Chat Functionalities:**

This will allow all participants of the Aibra app to interact professionally, post important information, like, follow and comment on each other's post in what is an interactive social verse.

### **3. Aibra Referral Program:**

This introduces another way to earn passive incomes for the aibra community, this provides incentives for users to refer the platform and earn from doing so:

Aibra Roadmap Version 2.0 will be released where we will begin the best and biggest phase yet for the AIBRA Platform with massive and mouth watery development in store

## OUR PARTNERS

Aibra due to its uniqueness hosts a wealth of partners from top projects on both brc20 blockchain and other chains as well. Some of our partners includes

- Coinhub
- 3D City
- Briseman
- Young Parrot NFT
- Graphen
